Percentage: 92.60%

Experience

Infosys Springboard

March 2024 – June 2024

Java Developer Intern - AngularJs , Java Springboot , MySQL , EmailJs , Bootstrap

Online

- Created an online matrimonial website that is user-friendly and allows for user registration, profile management, and communication.
- Key features such as user authentication, communication management, and an admin dashboard were implemented.
- REST APIs were created to simplify interactions between different components of the application.
- Enhanced user engagement and interaction by integrating EmailJS for email notifications.

Projects

Multi-Client Realtime Chat Application | *React, Node, ExpressJs, MongoDB, Socket.io , Github*

November 2023

- Directed the creation of a secure and expressive real-time chat app by utilizing the dependable MERN stack of MongoDB, Express.js, and React.
- This feature-rich chat application includes advanced security measures and real-time capabilities.
- Passwords are hashed using the bcrypt algorithm to safeguard user data.
- An emoji feature was added through React components, allowing users to express themselves visually. Additionally, Socket.io was integrated to enable real-time communication between users.

Space-Shooter Game | *Python*

November 2020

- Designed and developed an immersive Space Shooter Mini-Game using Python and the Pygame library, showcasing proficiency in game development.
- Implemented dynamic gameplay, challenging levels, and a heart-based life system, demonstrating creativity and attention to user experience.
